96 Flock Rams

NEW ARMATREE 12th ON PROPERTY FLOCK RAM SALE

Thursday 10th September

**Offering 96
Performance tested
Vet Checked Rams
Flock Number 4786**

Inspection from 11am
Complimentary lunch 12noon
Auction 1pm

Auction will be fully interfaced with AuctionsPlus

Selling Agents:
Steve Colwell, Halcroft & Bennett
Scott Thrift, Elders

a/c Craig & Jenny Bradley
0428 422 234 | 0428 256 593

Breeding Advisor:
Ash White 0411 139 654

Welcome to our 12th on property ram sale.

Whilst we enjoy the positive seasonal conditions 2020 has brought, it has also given us one of our biggest challenges in selling this year with the ever changing conditions around dealing with COVID.

To assist you and keep everyone safe, we have registered the business as COVID SAFE with the NSW Government. At the sale **COVID-safe measures will be in place**. To reduce the COVID risk we would ask that no more than two people per business attend. Please do not attend if you have travelled to a hot spot in the last two weeks, have been in contact with someone suspected of having coronavirus, or have any symptoms of the virus. If this prevents you from attending please contact Craig or Jenny (or the agents) for alternative arrangements.

We have undertaken a higher level of OJD testing to maintain confidence in the rams we present for sale. The Pooled Faecal Culture Test, which was conducted in April and takes three months to receive results, returned a negative result. We will continue to undertake this test every three years. The test results will be recorded on your SHD with the date of testing being 6th August 2020.

This year New Armatree stud ram 18-0116 was selected in a \$uperBorder Genetic Improvement Program and used across six \$uperBorder studs as well as two other studs in Victoria and South Australia. NA 18-0116 also has a number of sons in this catalogue.

Our Team combine strict structural assessment, capture quality data on production traits to deliver the 2020 sale ram catalogue.

Remember you can follow us via our website **www.newarmatree.com.au** or on Facebook.

Looking forward to seeing you on sale day,

Jenny and Craig Bradley

Please bring this catalogue with you on sale day.

‘New Armatree’ Health Record

Flock tested OJD negative -
Pooled Faecal Culture - Ovine Johnes Disease
Date tested: 6th August 2020

Brucellosis Flock Accreditation No.: Cw 99/17
Expiry Date: August 2022

Vaccinated with 6 in1 at marking and weaning
Last vaccination: 9th July, 2020

Shorn: 13th June 2020

We recommend that you quarantine drench your rams when you get them home, according to your drench resistance and rotation program.

No toes have been trimmed on our sale rams.

Rams are presented in pens for sale
with no straw.

All Rams Vet inspected and checked:
Monday, 7th September, 2020
by Dr Nadine Allan, Gilgandra Veterinary Clinic

Memorandum of Sires used at 'New Armatree' in the 2019 Breeding Season

- **New Armatree 2015/0070 (F8919)** Blue disks

- **New Armatree 2016/0090 (G420)** Pink disks
Sire: Hanookra 2014/0132 (F7618)

Sale Catalogue Averages and Trends

To assist you with your selection, we have included the following table which shows the catalogue average value for all traits along with the highest and lowest figure in the catalogue for that trait. For your interest, we have also included the averages from the past two catalogues so you can monitor the genetic trends of the sale rams we present each year. Please note we have over 40% more rams in the catalogue this year, so the year on year gain is not as great as the past years. But overall the flock is still making significant progress.

Catalogue	Bwt	Mwwt	Pwwt	Pfat	Pemd	NLW %	BLX
Highest 2020	0.5	1.6	10.5	2.8	2.4	24	143.5
Lowest 2020	0.0	-1.3	4.4	-1.1	-0.8	2	115.3
Average 2020	0.2	-0.1	7.7	0.2	0.9	11.6	125.0
Average 2019	0.3	0.5	7.7	0.4	0.9	10.3	125.8
Average 2018	0.3	0.3	7.1	-0.2	0.5	10.0	121.6

The 2020 SuperBorder cut off BLX Index figure is 117.6.

Those rams in the catalogue above 117.6, ie Superborders, are denoted by \$ next to their BLX figure. Those ASBVs marked with * indicate the animal is the the **top 20%** of the breed for that particular trait. If you would like to discuss these ASBVs further, please ask us on sale day.

Inside the back cover of the catalogue you will find a Percentile Report. In this report are a range of trait figures from the top of the breed to the bottom of the breed. The 50 percentile band is close to the average for the breed. Use this chart to check where animals fit within the breed for particular traits and index.

The BLX Index

This is a **Border Leicester Crossing Index** and has been designed by Lambplan to better reflect the desired traits for first cross ewe production. Within the **BLX Index** there is more emphasis placed on the maternal traits such as maternal weaning weight and Number of Lambs Weaned (NLW) as well as early growth while capping adult ewe weights. The BLX Index can not and should not be compared to the Maternal \$ Index you might see in other publications.

Understanding the Traits in the Catalogue (ASBVs)

All Australian Sheep Breeding Values (ASBVs) used in this catalogue are based on the Sheep Genetics Australia Lambplan Maternal analysis on 15th August, 2020.

Abbreviation	Trait	Units	Description
BWT	Birth weight	kg	Genetic difference in liveweight at birth
MWWT	Maternal Weaning weight	kg	Estimate of female progeny's ability to provide a good maternal environment
PWT	Post weaning weight	kg	Genetic difference in live weight gain between weaning and 10 months of age (growth)
PFAT	Post weaning fat depth	mm	Genetic difference in fat depth at 10 months of age
PEMD	Post weaning eye muscle depth	mm	Genetic difference in eye muscle depth at the loin at 10 months of age
NLW	Number of Lambs Weaned	%	Estimates the genetic difference between female progeny of a ram for the number of lambs weaned
BLX	Border Leicester Crossing Index		Indicates the relative value of an animal based on its suitability for first cross ewe and wether production
Acc	Accuracies	%	Are a reflection on the amount and quality of information available used to calculate ASBVs for each animal. Accuracies are important but are more relevant to people purchasing stud rams.

For more information about individual ASBVs and Indexes please visit www.genetics.mla.com.au

Please remember that it is the average of your ram team that is more important than the absolute values for each individual ram.

Selecting rams with suitable ASBVs for individual traits (according to your breeding objectives), may be better than selecting rams with a high BLX index. The important thing to remember is that your new rams should have a better average than your existing ram team. If this is true, then your ram team is improving year on year.

Elders

SuperBorders is the brand name for Border Leicester rams that are of high genetic merit for a first cross production system. The official SuperBorder yellow ear tags allow Superborder rams to be easily identified.

To qualify as a SuperBorder a Border Leicester ram must be above the 50th percentile for the breed based on the BLX index (Border Leicester Cross Index). The 50th percentile index value is calculated based on the 15th of August LAMB-PLAN run each year. It is used to determine SuperBorder rams for that selling season. The BLX Index has been developed for production systems using Border Leicester sires crossed to Merino dams to produce first cross progeny. BLX balances maintaining mature size with significant improvements in early growth and reproduction. A higher BLX index targets animals that are more profitable in this production system.

Not all rams sold by SuperBorder members are necessarily SuperBorder quality, but are bred by committed, registered breeders striving for genetic gain. SuperBorder rams must be structurally sound and of good breed type.

The SuperBorders group is made up of a number of studs across five states who work together in meeting market requirements for objectively measured maternal genetics in the Australian Lamb Industry. SuperBorders members are industry leaders with longstanding involvement in research, trials and industry resource flocks.

First cross lambs sired by 100% SuperBorder rams may be sold as 'Bred from SuperBorders'. Special yellow pen cards and SuperBorders ear tags are available to identify these animals when sold in physical sales. Virtual yellow sale cards are also available for SuperBorders progeny sold on online sale platforms. Please speak with us if you would like either of these marketing materials.
