# **NEW ARMATREE 15th ON PROPERTY FLOCK RAM SALE**

**Thursday 14th September**

**Offering 100  
Performance Recorded  
Vet Checked Rams  
Flock Number 4786**

**Inspection from 11am  
Complimentary lunch 12noon  
Auction 1pm**

Auction will be fully interfaced with AuctionsPlus

*Australia's Livestock Marketplace*

**Selling Agents:**

**Steve Colwell, Halcroft & Bennett**

**Scott Thrift, AWN (Australian Wool Network)**

**a/c Craig & Jenny Bradley  
0428 422 234 | 0428 256 593**

**Breeding Advisor:  
Ash White 0411 139 654**

*Welcome,*

To our 15th annual on property sale catalogue.

Looking on the bright side of a pretty ordinary combination of livestock prices, wool prices and seasonal conditions, ram pricing will align accordingly. This equates to a situation where it has probably never been a better time to source top genetics at very affordable prices. Good times for flock ram buyers.

We have 100 rams on offer, where the average BLX (Border Leicester Crossing Index) of the catalogue is in the **top 20% for the breed**. BLX is the correct Index to use in first cross ewe production systems.

NA strengths remain focused on balanced productive sheep, with carcass attributes and reproductive performance plus conformation. We remain focused on achieving the stud's Breeding Objectives. A comprehensive explanation of these can be found on our website ([www.newarmatree.com.au](http://www.newarmatree.com.au)).

Foot scoring is an important part of the conformation package. We have included this handy guide to assist in your buying decisions. Both front and back feet are scored. Rams catalogued will not have a foot score greater than 2. In order for rams to be retained in stud they must be score 1. You can find more detail on the scoring guide included within this catalogue.

All sale rams will be vet checked on the 12<sup>th</sup> September, two days prior to the sale. Dr Nadine Allan will perform that check. A certificate of the vet check will be on display at the registration table on sale day.

Selling lambs by NA rams under our "Sired By" Logo has produced some great results for our clients. This gives us a real kick as we see value in the genetics we invest in flowing through the sheep industry. Testimony to this is repeat buyers who value consistency in the first cross ewe performance and are purchasing on the "Sired By" Logo.

When you arrive at the sale, we are asking that you respect our farm biosecurity and clean boots by using the boot scraper and the disinfectant mat prior to entering the yards. This simple step is to ensure that your biosecurity standards are maintained along with ours.

*Jenny, Craig and Jack*

**Please bring this catalogue with you on Sale Day.**

# New Armatree Health Record

Brucellosis Flock Accreditation No. 76395

Expiry Date: 30th September, 2025

OJD Pooled Faecal Culture

Negative result 24th January, 2023

Vaccinated with 6 in 1 at marking and weaning

Last vaccination: 12th June, 2023

Shorn: 12th June, 2023

Drenched: 12th June, 2023

We recommend that you quarantine drench your rams when you get them home, according to your drench resistance and rotation program.

No Toes have been trimmed on our sale rams.

All sale rams are foot scored -  
see explanation in this catalogue.

Rams are presented in pens for sale  
with no straw.

All Rams Vet inspected and checked:  
Tuesday, 12th September, 2023  
by Dr Nadine Allan, Gilgandra Veterinary Clinic

4% rebate to outside Agents accompanying clients and settling on their behalf within 7 days.

## Please Note

New Armatree Border Leicesters retains semen rights for all rams sold at this sale

BORDER LEICESTERS

## Sale Catalogue Averages and Trends

To assist you with your selection, we have included the following table which shows the catalogue averages for 2021, 2022 and 2023, enabling you to monitor the genetic trends of the sale rams we present each year.

Catalogue	Bwt	Mlwwt	Pwt	Pfat	Pemd	WR	BLX
Average 2021	0.3	-0.3	8.1	0.0	0.9	0.05	120.6
Average 2022	0.2	0.2	8.2	0.6	1.3	0.10	129.6
Average 2023	0.25	0.3	9.6	0.7	1.2	0.10	132.5

**The BLX Index 50 percentile band figure for 2023 (based on 15th August, 2023 Lambplan run) is 118.85.** All rams in this catalogue are above this figure and therefore are above breed average. In fact, **the catalogue average for BLX Index is 132.5 which is in the top 20% for the breed.** The rams will have a coloured button behind their Lot Number tag. This button indicates which percentile band the ram falls into in relation to their BLX Index. Within the catalogue, ASBVs and BLX Index are also shaded according to percentile.

	Pink shading or button= Top 5%
	Blue shading or button = Top 10%
	Green shading or button = Top 20%
	White button = Top 40%

At the back of the catalogue, you will find a **Percentile Report**. On this report are a range of trait figures from the top of the breed to the bottom of the breed. The 50-percentile band is close to the average for the breed. Use this report to check where animals fit within the breed for particular traits and BLX index.

## The BLX Index

This is a **Border Leicester Crossing Index** and has been designed by LAMBPLAN to better reflect the desired traits for first cross ewe production. Within the **BLX Index** there is more emphasis placed on the maternal traits such as maternal weaning weight and Weaning Rate (WR) as well as early growth while capping adult ewe weights. The BLX Index cannot and should not be compared to other indexes used within the industry that you may see in other catalogues. We report the BLX index as this most accurately reflects our client's production systems. It is the only index that should be used when comparing Border Leicester rams across flocks that are to be used for FX Ewe production.

# Understanding the Traits in the Catalogue (ASBVs)

All Australian Sheep Breeding Values (ASBVs) used in this catalogue are based on the Sheep Genetics LAMBPLAN Maternal analysis from 15th August, 2023.

Abbreviation	Trait	Units	Description
BWT	Birth weight	kg	Genetic difference in liveweight at birth of a sires progeny
MWWT	Maternal Weaning weight	kg	Genetics difference in a sires female progeny's ability to provide a good maternal environment
PWT	Post weaning weight	kg	Genetic difference in live weight at approximately 9 months of age of a sires progeny
PFAT	Post weaning fat depth	mm	Genetic difference in fat depth at 9 months of age of a sires progeny
PEMD	Post weaning eye muscle depth	mm	Genetic difference in eye muscle depth at the loin at 9 months of age of a sires progeny
WR	Weaning rate	Lambs per ewe joined	Estimates the genetic difference between female progeny of a sire for the number of lambs present at weaning
BLX	Border Leicester Crossing Index		Indicates the relative value of an animal based on its suitability for first cross ewe and wether production
Acc	Accuracies	%	Are a reflection on the amount and quality of information available used to calculate ASBVs for each animal. Accuracies are important but are more relevant to people purchasing stud rams.

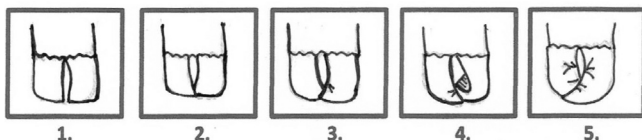

For more information on individual ASBVs and Indexes please visit [www.genetics.mla.com.au](http://www.genetics.mla.com.au)

Please remember that it is the average of your ram team that is more important than the absolute values for each individual ram.

Selecting rams with suitable ASBVs for individual traits (according to your breeding objectives), may be better than selecting rams with a high BLX index. The important thing to remember is that your new rams should have a better average than your existing ram team. If this is true, then your ram team is improving year on year.

# New Armatree Foot Scoring Guide

**1.** Ideal – Short and sharp – this is NA’s objective on 4 feet for every sheep bred.

**2.** Acceptable for sale catalogue and commercial rams. A slightly longer toe with weight distributed evenly.

**3.** Toe is longer than illustrated in 2, weight is even but possibly will need trimming with age.

\*NB in 1,2 and 3 weight is born square over the claws, so structurally strong but with varying degrees of curl in the toe.

**4.** Uneven claw set, larger amount of claw separation, only acceptable for industry use with trimming.

Weight not born squarely on both claws so foot starts to deform eg turns in or out, rolls or clubby.

**5.** Uneven claw set and foot is distorted because of uneven bearing of weight and toes subsequently are distorted – these sheep are culls.

## Additional information

Foot scoring at New Armatree occurs twice before being offered for sale.

Rams listed in the annual sale catalogue must be either a 1 or 2.

During a ram’s life time, feet care and toe trimming may be required to maintain performance.

## Catalogue Foot Scoring Guide

In the catalogue you will notice within the table of each lot a foot score.

F = Front toe and B= Back toe

These scores refer to the foot scoring guide presented above.

## Eating Quality (EQ)

Catalogue average is in the **top 30% for IMF**

**(Intra Muscular Fat) and SF5 (Shear Force)**

NA has focused on EQ traits increasingly as the market signals and feedback have come on board. Some processors are now rewarding producers by providing price differentials in particular on IMF

NA see EQ traits as an emerging economic driver and our breeding objectives and this catalogue reflect that forward direction.

For a full spreadsheet catalogue with Eating Quality traits - please call or visit our website.
